

International Conference on Integration of Knowledge Intensive Multi-Agent System, 2003 (KIMAS'03)

IEEE Boston Section One Center Street,
Suite 203 Wakefield,
MA, USA 01880
Fax: 781-245-5406

Table of Contents

iii	KIMAS'03 Forewords	Allon Guez, Drexel University, Philadelphia, PA
iv	KIMAS'03 Conference Organization	Session 1.2: Applied Linguistic Representation
v	KIMAS'03 Invited Talks	36 A Multi-Agent System for Natural Language Understanding Mostafa Aref, Dept. Comp. Science and Engineering University of Bridgeport, CT
Keynote Plenary Lectures		
2	Knowledge Understanding and Behavior James S. Albus, National Institute of Standards and Technology	41 Design and Implementation of An Agent-Oriented Expert System of Loan Risk Evaluation YU Guo-an, XU Hong-bing, WU Chao, Department of Computer Science and Engineering, Southeast University, Nanjing, China
9	Intelligent Nodes for Course of Actions Analysis Edward Dawidowicz, US Army, CECOM, RDEC Command and Control Directorate	46 An Organization-Based Adaptive Information System for Battlefield Situational Analysis Eric Matson and Scott DeLoach, Multi-agent and Cooperative Robotics Laboratory, Department of Information and Computing Science, Kansas State University
Session 1.1: Intelligent Agents with Elements of Autonomy		
14	Can Your Autonomous Robot Come Out And Play? Luis O. Arata, Department of Fine Arts, Languages, and Philosophy Quinnipiac University Hamden, CT	52 Avoiding Collision Logjams through Cooperation and Conflict Propagation K. Madhava Krishna, Henry Hexmoor and Suba Rao Pasapuletti, University of Arkansas
19	Agent-based Dynamic Information Security Model H. Kuo, M, National Defense Management College, Taiwan, R.O.C.	58 Modeling of Knowledge Intensive Computerized Systems Based on Capability-Oriented Agent Theory (COAT) Atoosa P-J Thunem, OECD Halden Reactor Project Institute for Energy Technology
25	Enhanced Frame-Based Knowledge Representation for an Intelligent Environment Chaminda Ranasinghe, Ajith P. Madurapperuma, Department of Computer Science University of Colombo, Sri Lanka	Session 1.3: Theoretical Aspects of Multi-Agent Systems
31	A Multiple Objectives Optimization Approach to Robotic Teams' Analysis, Design and Control	65 Automata Theory for Multi-Agent Systems Implementation

Lev Naumov and Anatoly Shalito, Saint-Peterburg State Institute of Fine Mechanics and Optics, Russia

71 Multiple Knowledge Intelligent System
Shigeki Sugiyama, Gifu Research & Development Foundation, Japan

77 SUO Communicator: Agent-based Support for Small Unit Operations
Barbara Brown¹, Paul Morris¹, Craig Thompson²; ¹ScenPro, Inc., Richardson, TX; ²University of Arkansas, Computer Science and Computer Engineering Dept., Fayetteville, AR

83 A proposal on a model of an autonomous agent using the meta-level architecture
Hiroshi Isikawa, T. Ozeki, Faculty of Engineering Fukuyama University, Japan, and E. Watanbe, Faculty of Science and Engineering, Konan University, Japan

88 Multi Agents in Mid Involvement deception Systems
Mohammad Reza Razzazi and Nargess Bathaeian, Amir Kabir University of technology, Tehran, Iran

94 Coping with Deception
Derrick Ward and Henry Hexmoor, University of Arkansas

Session 1.4: Multiple Agents in Knowledge Intensive Dynamic Systems

100 MKIDS - Management of Knowledge Intensive Dynamic Systems
Sidney Berkowitz, Ph.D., Department of Defense Fort Meade, Maryland

105 Coordinating Activity in Knowledge-Intensive Dynamic Systems
Stephen F. Smith, Director, Intelligent Coordination and Logistics Lab. Robotics Institute Carnegie Mellon University

109 Market-Based Task Allocation for Dynamic Information Processing Environments
Michael P. Wellman, Computer Science and Engineering, Artificial Intel. Lab. University of Michigan

115 The Virtual Design Team (VDT): A Multi-Agent Analysis Framework for Designing Project Organizations
Raymond E. Levitt, Civil and Environ. Eng., Stanford University

121 Destabilizing Dynamic Networks Under Conditions of Uncertainty
Katleen M. Carley, Carnegie-Mellon University; Steve Borgatti, Boston College, Jeffrey Reminga, Institute for Software Research International, Carnegie-Mellon University

127 Identifying Sets of Key Players in a Network
Steve Borgatti, Boston College

Session 1.5: Learning and Evolution

133 Catalytic Reaction Sets, Decay, and the Preservation of Information
Wim Hordijk and José F. Fontanari, Instituto de Física de São Carlos, Universidade de São Paulo, São Carlos, SP, Brazil

139 A Hierarchical Genetic Algorithm with search space partitioning scheme
Gautam Garai, Computer Division, Saha Institute of Nuclear Physics, West Bengal, INDIA and B. B. Chaudhuri, Computer Vision and Pattern Recognition Unit, Indian Statistical Institute, Kolkata –INDIA

145 Evolution of Complex Autonomous Robot Behaviors using Competitive Fitness
A. L. Nelson, E. Grant, G. Barlow, and M. White, Center for Robotics and Intelligent Machines, Department of Electrical and Computer Engineering North Carolina State University

151 Cellular Inference Network (CIN) for Learning and Control of Multi-Agents Cooperation
Qiuming Zhu, Department of Computer Science University of Nebraska at Omaha; Richard A. Flanagan, Jeffrey D. Hicks, Plamen V. Petrov, and Alexander D. Stoyen, 21st Century Systems, Inc., Herndon, Virginia

Session 1.6: Sapient Systems (A Workshop-Discussion)

158 Towards Computational Sapience (Wisdom): A Paradigm for Sapient (Wise) Systems
Rene V. Mayorga, University of Regina, Regina, Canada

166 Sapient Agents - Seven Approaches
Zbigniew Skolicki, Tomasz Arciszewski, George Mason University, Fairfax, VA, USA

172 A Characterization of Sapient Agents

- Marco Wiering, Mehdi Dastani, Martijn van Otterlo, John-Jules Meyer, Utrecht University, The Netherlands
- 178 Sapient Structures for Sapient Control**
Ron Cottam, Willy Ranson, Roger Vounckx, Brussels Free University, Belgium
- Session 1.7: Integration of Multiagent Knowledge**
- 184 Integrating Organizational Knowledge for Dynamic Scalable Multiagent Systems**
Wayne A. Smith, Physics & Computer Science Presbyterian College, Clinton, SC and John R. Rose, Computer Science & Engineering University of South Carolina, Clinton, SC
- 190 Airborne Learning Algorithms. A Case Of a Ground Target Multiple Hypothesis Tracker**
Simon Streltsov, Mercury Computer Systems, Inc. 199 Riverneck Rd., Chelmsford MA 01824-8596
- 196 Advanced Core Design Using Multi-Agents Algorithm**
Yoko Kobayashi, Eitaro Aiyoshi, Tepco Systems Corporation, Tokio, Japan
- 203 Integration of Development methodologies for the Building of Knowledge Intensive Multiagent Systems**
Isabel María del Aguila¹, Joaquín Cañadas¹, José T. Palma-Méndez² and Samuel Túnez¹ ¹ Dept. of Languages and Computation. University of Almería. 04120-E. Almería, Spain. ² Dept. of Information and Communications Engineering. University of Murcia, Spain
- 209 Multi-Tier Communication Abstractions for Distributed Multi-Agents Systems**
Michael Thome, BBN Technologies, Cambridge, MA 02138
- 215 CONSMAG: Knowledge Representation Based Upon Consensus for Multiple Agents**
Donald W. Dearholt, New Mexico State University
- Session 1.8: Specifics of Multiagent Systems**
- 224 Cooperative Multiple Robots Prevent Energy Repletion Problem**
Takao Kawamura, Kimihito Hourai, and Kazunori Sugahara, Department of Information and Knowledge Engineering, Tottori University, Japan
- 230 An Infrastructure for Adaptive Control of Multi-Agent Systems**
Karl P Kleinmann, Richard Lazarus, and Ray Tomlinson, BBN Technologies Cambridge, MA 02138
- 237 Integrating knowledge centered MAS through organizational links**
Gustavo Gimenes Lugo, Jaime Simão Sichman, and Jomi Fred Hubner, LTI/EP/USP, Sa0 Paulo, SP, Brazil
- 243 A Data Mining Based Algorithm for Traffic Network Flow Forecasting**
Xiaoyan Gong and Xiaoming Liu, Chinese Academy of Sciences, Beijing, 100080, China
- 249 Agent-Based Systems — Key Enabler for the Army Future Force**
Dirk R. Klose, US Army CECOM Command and Control (C2) Directorate
- Session 1.9: Computationally Demanding Sensor Applications**
- 256 Joint Synthetic Battlespace (JSB) Technology and Infrastructure Consideration**
David Kwak., Lt. Col. Emily Andrew, Capt. Lucas Flanagan Capt. Jack Murtha, Lt. Denise Herrera, and Lt. Don Brown
- 264 Adaptive Radar Signal Processing-The Problem of Exponential Computational Cost**
Muralidhar Rangaswamy, AFRL/SNHE, Hanscom AFB, MA
- 270 Artificial Intelligence and Waveform Diversity**
Gerard T. Capraro, Capraro Technologies, Inc., and Michael C. Wicks, Air Force Research Laboratory
- 275 Multi-agent Moving Target Search in a Hazy Environment**
Ramachandra Kota, Sviatoslav Braynov and James Llinas, University at Buffalo, State University of New York
- Keynote Plenary Lecture**
- 280 Integration of Language and Cognition at Pre-Conceptual Level**
Leonid Perlovsky, Air Force Research Laboratory, Hanscom AFB, MA
- Session 2.1: Acquisition of Language and**

- Structure
- 287 **A Fuzzy Model of Natural Language Acquisition and Syntax Recognition by Humans**
Salomon Klaczko and Fuad Aliev, LOPOS Technologies GmbH Ness, Hamburg
- 294 **Vision Systems are Using the Wrong Kind of Information!**
J. Merchant, RPU Technology, MA
- 300 **Dynamic composition of process Federations for context aware perception of human activity**
James L. Crowley, Patrick Reignier, I.N.P.G. Projet PRIMA-INRIA Rhone Alpes Laboratoire GRAVIR-IMAG, France
- 306 **Contextual Vocabulary Acquisition: From Algorithm to Curriculum**
William J. Rapaport¹ and Michael W. Kibby²
¹Department of Computer Science & Engineering, Department of Phil., and Center for Cognitive Sci.; ²Department of Learning & Instruction, State University of New York at Buffalo
- 312 **A Family of Agent Based Models**
Lee S. Krause, Lynn A. Lehman, and Aaron Wheeler; Securboration, Indialantic, FL
- 318 **A Toolkit for the search of the Most General Interpretable Hypotheses**
Marina Sapir and Simon Sherman, ProGenomix, Inc Omaha, NE
- Session 2.2: Information Representation and Knowledge Extraction With Applications to Image Analysis and Interpretation**
- 325 **Intelligent Sensor Resource Management Using Evolutionary Computing Techniques**
Douglas W. Burgess, Chester L. Levins
XonTech, Inc. Burlington, MA
- 330 **An Introduction to Perceptual Organization**
Sudeep Sarkar, University of South Florida, Tampa FL
- 336 **A k-Partition, Graph Theoretic Approach to Perceptual Organization**
Jeffrey Byrne, Avinash Gandhe, Ravi K. Prasanth, B. Ravichandan, Melvyn Huff and Raman K. Mehra, Scientific Systems Company Inc., Woburn, MA, Sudeep Sarkar, University of South Florida, Tampa, FL Sanjoy K. Mitter and Stefano Casadei, Massachusetts Institute of Technology, Cambridge, MA
- 343 **Unified Bayes Multitarget Fusion of Ambiguous Data Sources**
Ronald Mahler, Lockheed Martin Tactical Systems, Eagan, MN
- 349 **Multisensors-Multitarget Sensor Management Using Geometric Objective Functions**
Adel El-Fallah, Mike Perloff, Avinash Gandhe, Scientific Systems Company, Woburn, MA
Ronald Mahler, Tim Zajic, Chad Stelzig, Lockheed Martin Tactical Systems, Eagan, MN
- 355 **Multisensor Image Fusion & Mining: From Neural Systems to COTS Software**
Allen Waxman, David Fay, and Richard Ivey, ALPHATECH Inc. Burlington, MA
- Session 2.3: Biologically-Inspired Systems and Image/Video Processing**
- 364 **Biologically-Inspired Algorithms for Object Recognition**
Igor Temovskiy, Dante Nakazawa, Shannon Campbell (RoS will ask him), Roland E. Suri
Intelligent Optical Systems, Torrance CA;
- 368 **Model Design and Data Analysis for Multi-Input Multi-Output Systems**
D. Nakazawa and A. Trunov
Intelligent Optical Systems, Torrance CA
- 375 **Application of Independent Component Analysis to Microarray Data**
R. E. Suri, Intelligent Optical Systems (IOS), Torrance.
- 379 **A Biologically Inspired Concept for Active Image Recognition**
R. E. Suri, Intelligent Optical Systems (IOS), Torrance.
- 385 **Object Pattern Recognition Below Clutter in Images**
Leonid Perlovsky¹, Chris Mutz¹, Bertus Weijers¹, Robert Linnehan², John Schindler², and Roger Brockett³; ¹Air Force Research Laboratory, Sensors Directorate; ²Veridian Corp.; ³Harvard University
- Session 2.4: Sapient Systems (A Workshop-Discussion 2)**
- 392 **Paradigms Behind a Discussion on Artificial Intelligent/Smart Systems**
José Negrete-Martínez, UNAM Universidad Veracruzana, Mexico

395 Toward Wisdom in Procedural Reasoning: DBI, not BDI

Kirk A. Weigand, Information Directorate, Air Force Research Laboratory

401 Meaning Generation and Artificial Wisdom

Ricardo Sanz, Julita Bermejo, Juan Escasany, Rafael Chinchilla and Carlos A. Garc'ya
Autonomous Systems Laboratory Universidad Polit'ecnica de Madrid Jos'e Guti'errez Abascal 2, 28006 Madrid, Spain

406 Higher Spiritual Abilities (Prolegomena to a Physical Theory)

Leonid Perlovsky, Air Force Research Laboratory, Hanscom AFB, MA

Keynote Plenary Lecture:

413 From intelligent robot to multi-agent robotic system

Toshio Fukuda, Department of Microsystem Engineering, Nagoya University Furo-cho, Nagoya, Japan

418 Multiresolutional Semiotics: Toward Understanding of Multiscale Intelligence

Alex Meystel, Drexel University, Philadelphia, PA

Session 2.6: Measuring the Performance

432 Problems of Performance Measurement in Locally Organized Systems

Vadim L. Stefanuk, Member of Russian Academy of Natural Sci. and International Informatics Academy; Vice-President of Russian Assoc. for Artificial Intelligence (RAAI)

438 Using Data-Mining to Allow Robots to Discover the Preferences of Humans

Louise F. Gunderson and James P. Gunderson, Gunderson & Gunderson, Inc, Denver, CO

444 Agent-Assisted document composition in specific domains

Kai-Liang Chang and Hewijin Christine Jiau, National Cheng Kung University Tainan

450 Towards an Epistemic Analysis of Causality in Distributed Systems

Aicha Mokhtari and Abdeslam Nasri, Institut'ee d'Informatique, USTHB, BP 32, EL Alia Algeria

Session 2.7: Processes of Interpretation

457 Coordinated Multi-Procedural Architecture for Probabilistic Knowledge Discovery

Nikola Bogunovic, EE & Computing Dept., University of Zagreb, Croatia

463 Elements of Theory of Interpretation

Alex Meystel, Drexel University, Philadelphia, PA

477 Agent-Based Interpretation of Geospatial Evidential Data

Mario E. Inghiosa, Richard Perline, Miles T. Parker, and Josh Miller, NuTech Solutions, Inc., Arlington, VA

483 Multi-Resolutional Knowledge Representation Using Prototypes and Properties

Jeffrey Berliner and Michael Thome, BBN Technologies Cambridge, MA

491 Combinatorial PCA and SVM Methods for feature selection in Learning Classification (Applications to text Categorization)

Andrei V. Angheliescu and Ilya B. Muchnik, Dimacs, Rutgers University, NJ

497 Emulating the Honeybee Information Sharing Model

Reginald L. Walker, Computer Science Department, UCLA at Los Angeles

Session 2.8: Nondeterministic Phenomena in Multiagent Systems

506 Image Compression in Real-Time Multiprocessor Systems Using Divisive K-Means Clustering

Ilya Muchnik, DIMACS, Rutgers University, NJ and Simon Streltsov, Mercury Compute Systems, Inc. Chemsford, MA

512 NDAS: The Nondeterministic Agent System for Engineering Drawing Analysis

Tom Henderson and Lavanya Swaminathan, School of Computing, University of Utah

517 A Non-Hierarchical Method for Distributed Hypothesis Management

Gabriel Pei and William Wright, BBN Technologies, Arlington, VA

523 Using Dynamic Classification to Expand Individual/Intuitive Search processes

Claude Vogel, Chief Science Officer at Convera Corporation

Academy; Vice-President of Russian Assoc. for Artificial Intelligence (RAAI)

Session 2.9: Dynamic Knowledge Intensive Domains I

Session 3.1: Dynamic Knowledge Intensive Domains II

529 Organizing and Accessing a Comprehensive Knowledge Base Using the World Wide Web

Boris Katz and Jimmy Lin, MIT Artificial Intelligence Laboratory, Cambridge, MA

580 Finding Unique Records and Record Groups in Unknown Data

Michael Winburn and Aaron Wheeler, 3 Sigma Research, Indialantic, FL

535 Rapid Knowledge Base Design via Extension of Mid-level Knowledge Components

John Everett, Daniel Bostwick, and Eric Jones, ALPHATECH, Inc.6 New England Executive Park Burlington, MA

585 Capabilities Aware Routing for Dynamic Ad-hoc Networks

Nathanial Gemelli, John Spina, and Peter LaMonica, AFRL/IFTB, Rome, New York

542 Architecture for Information Assurance Decision Support Systems based on Integration of Knowledge Intensive Multi-Agent Systems

Peter P. Chen, Louisiana State University, Computer Science Dept Baton Rouge, LA

591 Artificial Intelligence and Sensor Fusion

Gerard Capraro, Gerald B. Berdan, Raymond, A.Liuzzi, and John Spina, Capraro Technologies, Inc., Utica, NY

547 Threat Response Management System (TRMS)

Perakath Benjamin and Satheesh Ramachandran, Knowledge Based Systems, Inc. College Station, TX

596 Task management in Sensor-provided Operator Platforms

Dan Strömberg and Fredrik Lantz, Department of Data and Information Fusion Division of Command and Control Systems, Swedish Defence Research Agency, FOI

555 CADRE: Continuous Analysis and Discovery from Relational Evidence

Nicholas Pioch, Dan Hunter, Eric Jones, Bob Washburn, Dan Bostwick, Amy Kao, Stephen Graham, Connie Fournelle, Tom Allen, Mike Dunn, and Kendra Moore Alphatech, Burlington, MA

602 STEM: a Methodology for the Development of Multiagent Design Tools Using a General Knowledge Model of Configurational Design

J.F. Bienvenido and I.M. Flores-Parra, Dpt. Languages and Computer Science. University of Almería. SPAIN

562 Semantic Knowledge Source Integration, A Progress Report

Zelal Gungordu and James Masters, Cycorp, Inc., Austin, TX

Session 3.2: Learning and Its Components

609 The Assessment of Knowledge in Theory and in Practice

Jean-Claude Falmagne, University of California, Irvine; Eric Cosyn and Nicolas Thiery, ALEKS Corporation; Jean-Paul Doignon, Free university of Brussels

Session 2.10: Lecture

616 Sharing Learning Policies between Multiple Mobile Robots

Panrasee Ritthipravat, Thavida Maneewarn, and Djitt Laowattana, Institute of Fiels roBOTics, King Mongkut's University of Technology Thonburi Bangmod, Bangkok, Thailand

568 The Technology and Practice of Integrated Multi-Agent Event Correlation Systems

Gabriel Jakobson, Smart Solutions Consulting, Inc., Brookline

622 Integration of Perception and Learning in the CAEDUS Cognitive Architecture

James O. Ross, Advanced Concepts Group L-3 Communications Integrated Systems

Keynote Plenary Lecture and Panel Discussion

575 In Search for Hidden Meaning: Pospelov's Work on Applied Semiotics

Vadim L. Stefanuk, Member of Russian Academy of Natural Sci. and International Informatics

628 Design and Implement of the Home Networking Service Agent Federation Using Open Service Gateway

Feng-Chao Yang, Department of Information Management Da-Yeh University Chunghua, Taiwan

634 Service Demand Analysis Using Multi-Attribute Learning Mechanisms

Akiya Inoue, Shoko Takahashi, Ken Nishimatsu, and Hiromichi Kawano, NTT Service Integration Laboratories, Musashino-Shi, Tokyo 180-8585 Japan

640 Clusters with Core-tail Hierarchical structure and their Application to machine Learning Classification

Ilya Muchnik and Dmitriy Fradkin, DIMACS, Rutgers University

Session 3.3: The Meaning of Meaning

647 Using a Semiotics-Inspired Tool for the Control of Intelligent Opponents in Computer Games

Victor K. Tatai and Ricardo R. Gudwin, DCA – FEEC – UNICAMP, Cx Postal 6101 – 13081-970 Campinas – SP – Brazil

653 Dynamics in Semiotics

Gennady S. Osipov, Program systems (software) Institute of the Russian academy of Sciences., Pereslavl-Zalessky

659 Advanced Models for Backscattering from Rough Surfaces

Adrian K. Fung and Saibun Tjuatja Wave Scattering Research Center Department of Electrical Engineering, UTA Box 19016 University of Texas at Arlington, TX

664 Decision-Making Processes in Organizations: A Logical-Semiotic Perspective

Ana Marostica, School of Economics University of Buenos Aires, Argentina

669 An Architecture for Combining Ways to Think

Push Singh, Marvin Minsky, MIT

Session 3.4: Lecture

676 Stochastic Search, Optimization, and the Simultaneous Perturbation Algorithm – A Tutorial

James C. Spall; The Johns Hopkins University

Session 3.5: Semantics

679 An Integrating Semantics of Hybrid Dynamic Systems

Jerzy Tomasik, LLAICI – Université d'Auvergne, BP86 – 63172 Aubiere, France

684 Dynamic Integration of Distributed Semantic Services

Guofei Jiang, Wayne Chung and George Cybenko; Thayer School of Engineering, Dartmouth College Hanover, NH

690 Search for Exploring Bodies of Data, Information and Knowledge

Eddie Robins, ESROTECH

703 On a Computational Model of the Peircean Semiosis

Antônio Gomes, Ricardo Gudwin & João Queiroz FEEC-UNICAMP, Cx Postal 6101 – 13081-970 Campinas – SP – Brazil

Session 3.6: Multi-Agent System Applications

710 Software Tool for Agent-Based Distributed Data Mining

Vladimir Gorodetsky Head of Intelligent system Lab. Oleg Karsaevy Senior Researcher of Intelligent system Lab. Vladimir Samoiloov Research Fellow of Intelligent system Lab. SPIIRAS, 39, 14-th Liniya St. Petersburg, 199178, Russia

716 Cooperative Multi-Agent Mobile Sensor Platforms for Jet Engine Inspection—Concept and Implementation

Edmond Wong, Jonathan S. Litt, Lawrence C. Greer, and Michael J. Krasowski, Controls and Dynamics Technology Branch NASA Glenn Research Center Cleveland, OH

722 Fast, Feature-Based Wavelet Shrinkage Algorithm for Image Denoising

Eric J. Balster, Air Force Resesarch Laboratory, OH

729 User-Centric Service Brokerage in a Personal Multi-Agent Environment

Mohammad-Reza Tazari and Karsten Plößer, Computer Graphics Center, Mobile Information Visualization

Session 3.7: From a Single Agent to Multiplicity of Agents

736 Emergent Hierarchies for Knowledge Agents

Carl Hein Lockheed

741 The Topologies of Cooperation in Knowledge Intensive Multi-Agent Systems

Qiuming Zhu1, Plamen V. Petrov2, Jeffrey D. Hicks2, and Alexander D. Stoyen2 1 Depart. of

Comp. Sci., University of Nebraska at Omaha 2
21st Century Systems, Inc., Herndon, zzaVirginia

747 A Knowledge-based Model to Database Retrieval

Paul Zellweger, ArborWay Labs, Inc. Cambridge, MA

754 A Logic-based Framework for Mobile Multi-Agent Systems

Takao Kawamura, Tsuoshi Kuwatani, Shin Kinoshita, and Kazunori Sugahara, Department of Information and Knowledge Engineering Faculty of Engineering, Tottori University, Japan

760 Knowledge Management for Engineers

Charles Derby, Senior Engineer, Logic Testsite & Macros Logic & Embedded Tech. Development (LEAD)

766 Autocreative Hierarchy II: Dynamics Self-organization, Emergence and Level-changing

Ron Cottam, Willy Ranson and Roger Vounckx, The Evolutionary Processing Group IMEC Brussels, ETRO Brussels Free University (VUB), Belgium

774 Author Index
